RFID ASSET SOFTWARE

WHY RFID ASSET?

RFID Asset is a powerful, RFID-based asset tracking software package designed for small and medium-sized businesses.

Paired with the power of using RFID technology, customers use this software to keep track of their organizations' most critical assets.

Quickly locate critical equipment and achieve real-time physical asset inventory directly from your computer and smart devices.

Enhance productivity by remotely monitoring your assets and RFID infrastructure.

Lower costs by avoiding purchasing redundant assets while reducing and reduce time spent searching for assets.

Simplify processes with accurate and timely inventories.

Find missing assets quickly and easily.

FAST, RELIABLE ASSET TRACKING

One of the complex challenges small and medium sized organizations face is efficiently keeping track of critical assets as their organizations scale.

Without a reliable automated asset management system, there is a sharp increase in redundancies, expenditures, and labor.

Imagine locating many diverse assets in a room in a matter of seconds, rather than hours. Because RFID technology reads multiple tags at once without requiring a line of sight, customers are able to more quickly and accurately locate and track assets without the physical challenges of scanning bar codes and manual methods.

RFID Asset maximizes Radio Frequency Identification technology to automate asset tracking and management in a wide variety of environments and situations.

The software supports passive RFID tags, bar codes, fixed readers and mobile devices such as the TSL Bluetooth RFID sled and Motorola / Symbol RFID handheld readers, including the 3910 and 9090.

WEB PORTAL

- Hosted, secure environment
- Supports up to 5,000 assets (Pro Edition)
- User profiles for accountability
- Configurable and flexible data fields
- Customizable dashboards and asset mapping (Pro Edition)
- Optimized for mobile devices
- Browsers supported:
  - - Safari 6X+
  - - IE 9X+
  - - Firefox 6X+
  - - Chrome 6X+
  - - Opera 6X+

RFID APP FOR SMART DEVICES AND RFID HANDHELD READERS

- Enables fast, accurate inventory
- Pairs with RFID sleds and fobs
- Or, runs on Motorola 3190 and 9090
- Works in conjunction with the main RFID Asset platform
- iOS and Android support for devices running
  - iOS 7&8
  - Android 4X+
