

Aldelo For Restaurants Wireless

- Fast & Responsive
- Unmatched Reliability
- Superior Data Protection
- Fully Integrated

Ideal Expansion for Our Pro Edition

Aldelo For Restaurants Wireless is the ideal expansion to complement our Aldelo For Restaurants Pro. Our wireless POS solution enables your staff to efficiently fulfill customer orders anywhere in the restaurant. You will experience better customer satisfaction and improved table turnover as a result.

Focus on the Customer

Aldelo For Restaurants Wireless enables your staff to focus on your customers. Our solution allows you to create and modify orders via wireless enabled PDA devices directly from your customers' table. No longer will your staff need to perform double order entry that may cause mistakes. All orders are efficiently sent to the kitchen & bar for quicker response via wireless network. Best of all, you have access to orders from both the wireless PDA and desktop POS.

Speed up Take Out and Drive Thru

Aldelo For Restaurants Wireless is also great as a line busting tool for speeding up take out and drive thru orders. Our wireless POS solution is a best of breed technology that enables wait staff to be truly wire free and mobile.
