

# Axicon Portable Verifier Accessories

## *Designed for use with the Axicon PV Verification Range*

### **Adding Protection**

Essential protection for your Axicon verifier. This protective rubber boot is moulded to slide on and grip your PV unit, helping to reduce accidental damage.

### **Adding Mobility**

Specifically designed belt bags are supplied with your Axicon PV unit<sup>1</sup>, providing a handy storage device when not in use as well as allowing you to transport your verifier with ease. Additional bags are available from Axicon.

### **Adding Power**

All PV units are supplied with a set of 4 AA alkaline batteries as standard<sup>2</sup>. In order to increase your scan time, why not upgrade to rechargeable NiMH rechargeable batteries and a charger.

### **Printing Options**

Axicon's policy of offering our customers maximum choice and flexibility now includes printing options on our portable range:

#### **Option 1: Data Transfer**

1. Save scans directly on to your PV unit.
2. Download to your PC
3. Print using your desktop printer and printing is required.

#### **Option 2: RS232**

Purchase a PV connection cable and print directly to your existing RS232 printer.<sup>3</sup>

#### **Option 3: Axicon Printer**

Purchase either a mains or battery powered printer from Axicon
