

# AXIS 70U Network Document Server

## *Smarter document distribution*

Connected to an office scanner, the AXIS 70U Network Document Server allows you to scan documents, reports and photos, and instantly e-mail them to any number of recipients.

Documents can be distributed as e-mail attachments in standard Adobe PDF formats, delivering higher image quality than documents sent by fax, even in full color. Supporting a variety of office scanners such as HP, Canon and Fujitsu, AXIS 70U connects to IP networks without the need for a PC or additional software making document distribution quick, easy and safe.

Easy to install and use, AXIS 70U provides a faster and more cost efficient method of distributing documents than by fax, traditional mail or courier.

- Communicates using Internet, not expensive phone lines
- Requires little maintenance (no need to add toner or paper)
- Documents are sent without delay directly to the receivers' e-mail Inbox
- Image quality is better than fax and not limited to black and white
- No busy tone or re-transmissions of multipage documents
