PCI Security Edition

RETAILER IN A BOX SERIES

Comprehensive Solutions for PCI Security

Retailer In-a-Box | PCI Security Edition provides up to date encrypted hardware and software solutions to aid in PCI Compliancy. Payment Card Industry (PCI) Data Security Standard (DSS) was crested to protect cardholder data. The PCI Security Point of Sale solution was designed as a result of regulations enacted around retaining and protecting customer information. Along with full point of sale functionality, benefits include:

- Data encrypted at the point of entry and only encrypted data is stored on the POS System

- Software integrates to encrypted MSR technology

- Integration capabilities with several credit card processors

This PCI Security Point of Sale solution will aid any retailer concerned with meeting PCI DSS Standards.

Retailer In-a-Box | PCI Security Edition is available exclusively at BlueStar!
