Brother® PocketJet® 6 and PocketJet® 6 Plus Mobile Printers

The Brother® PocketJet® 6 and PocketJet® 6 Plus Mobile Printers are the newest generation of the popular and reliable PocketJet® family of full-size, 8 ½" wide mobile printers. These lightweight printers feature faster print speed, up to 6 ppm, high-quality output, up to 300 dpi, compact size, ease of operation, and the proven reliability of direct thermal printing technology.

Four models to choose from:

PocketJet® 6 and PocketJet® 6 with Bluetooth® technology

- Print resolution - 203 X 200 dpi
- For crisp printing of forms and reports
- High-quality output while helping to lower the cost of mobile printing

PocketJet® 6 Plus and PocketJet® 6 Plus with Bluetooth® technology

- Print resolution - 300 X 300 dpi
- Laser-quality document printing
- For applications that require the best output for text, graphics, and logos

The PocketJet® 6 Plus mobile printers feature high-quality, 300 dpi printing for applications that require the best output for text and graphics. The PocketJet® 6 printers, with 200 dpi resolution, provide a high-quality output while helping to lower the cost of mobile printing. Each printer comes standard with USB 2.0 and IrDA interfaces, and a Bluetooth® wireless technology interface is available as an option. The PocketJet® 6 and PocketJet® 6 Plus mobile printers also have a number of advanced features to help improve overall performance: optional Li-ion battery for increased battery yield and longer battery life, Bluetooth® Imaging Protocol support for downloading and printing JPEG files, the ability to store document overlays in the printer* to minimize data transfer, and full-featured design software for creating and downloading the document overlays.

The PocketJet® 6 mobile printers weigh less than 1.4 lbs. with the NiMH battery and measure about 10" L x 2.2" W x 1.2" H. When used with the NiMH battery, the PocketJet® 6 printers have the same small form factor as previous models, so you can immediately upgrade to the PocketJet® 6 to take advantage of the new product features and improved performance while preserving your investment in vehicle mounts and other accessories.

The Brother PocketJet® 6 and PocketJet® 6 Plus mobile printers use the proven and reliable direct thermal printing technology, which provides several benefits, including: low maintenance costs - no ink or ribbons to replace, higher reliability than other technologies due to fewer moving parts, quiet printing, and the ability to mount the printer in a vehicle in just about any orientation. The compact design of the PocketJet® 6 allows the printers to fit in places where space is limited, and the short paper path means there is less chance of a paper jam or misfeed.

The PocketJet® 6 mobile printers are available in multiple configurations in order to give you the greatest flexibility. The printers can be purchased separately for in-vehicle installations, or in one of several kits, which can include a battery, cables, power adapters, documentation, carrying case, and paper. Optional vehicle mounts are also available.

Public Safety

Field Service

Applications:

Public Safety:

PocketJet® printers have proven their reliability in public safety applications for many years. The PocketJet® 6 and PocketJet® 6 Plus mobile printers provide faster throughput and improved performance when compared to previous models, while protecting customer investments in vehicle mounts and other accessories.

- Traffic Citations
- Accident Reports
- Warning Notices
- Parking Violations
- Safety Inspection Certificates
- Emergency Instructions Reports

Field Service:

Field service operations can benefit from PocketJet® 6 and PocketJet® 6 Plus mobile printers in a number of ways. On-site printing of high-quality customer documents can help improve customer satisfaction, increase worker productivity, reduce errors, and shorten billing cycles.

- Receipts and Invoices
- Work Orders
- Service Records
- Repair Estimates
- Chemical Data Sheets
- Maintenance and Repair Reports

Route Accounting:

The PocketJet® 6 and PocketJet® 6 Plus mobile printers provide a full-size alternative for route accounting applications and delivery services of all kinds. They are a perfect replacement for dot matrix printers. Customers prefer 8 ½" x 11" documents because they are easier to read and store for record keeping.

- Customer Invoices
- Product Order Forms
- Customer Order History
- Delivery Notices
- Returned Goods Receipts
- Product Promotions

Insurance / Field Services:

Insurance field workers need to be professional, efficient, and provide a high level of customer satisfaction. PocketJet® 6 and PocketJet® 6 Plus mobile printers can help improve worker productivity and customer satisfaction by allowing field professionals to print important customer documents on demand.

- Accident Reports
- Repair Authorizations
- Financial Plans
- Appraisals and Work Estimates
- Contracts and Price Quotes
- Insurance Policies

Key Product Features

- Prints on 8.5" wide thermal media - cut sheets for letter and legal size documents, continuous roll paper for longer printouts, and perforated roll and fanfold paper.
- Fast mobile printing – up to 6 ppm.
- High print quality – print crisp text and images (300 dpi for the Brother® PocketJet® 6 Plus).
- USB and IrDA interfaces; optional Bluetooth® technology interface.
- Low maintenance costs - no ink or ribbons to replace.
- Compact size – fits in places where space is limited.
- Lightweight – less than 1.4 lbs. including NiMH battery.
- Optional Li-ion battery for increased yield and longer battery life.
- Optional car adapter facilitates in-vehicle printing.
- Can be mounted in a vehicle in just about any orientation.
- Can store document overlays in the printer* to minimize data transfer.
- Support for downloading and printing JPEG files.
- Full-featured design software for creating and downloading document overlays is included with the PocketJet® 6 Plus.
- Direct thermal technology is less susceptible to temperature and humidity extremes than other mobile printing technologies.

Easy Integration for Laptops and Handheld Devices

Brother® provides the necessary tools for application developers to easily integrate mobile printing into their line-of-business applications. Printer drivers are available for Windows® and Mac® OS. Software development kits are available for Windows® Mobile and BlackBerry® applications. And advanced features in the PocketJet® 6 and PocketJet® 6 Plus mobile printers provide the ability to directly download and print JPEG files and store form overlays in the printer* to minimize development time. Full-featured design software for creating and downloading the form overlays is included with the printers. Development support and custom drivers are also available for Android™, Symbian®, Linux®, and other mobile operating systems.

A Variety of Media Options

(Separate purchased required)

A wide variety of high-quality thermal media is available for the Brother® PocketJet® 6 and PocketJet® 6 Plus mobile printers as individual cut sheets for letter and legal size documents, continuous roll paper for longer printouts, and perforated roll and fanfold paper, any of which can be pre-printed with a company logo or a custom design. Synthetic, weatherproof media is available for documents that are exposed to the environment, such as work orders, citations, receipts, and more. Premium thermal paper is available for archival purposes that will last for 20 years. See the Brother® PocketJet® Media Guide for information on available paper options.

PocketJet® 6 Kits

The Brother® PocketJet® 6 and PocketJet® 6 Plus printers are available in several configurations to provide flexibility for your specific application. All PocketJet® 6 and PocketJet® 6 Plus Kits include a printer, carrying case, NiMH battery, USB cable, AC adapter and power cord, a pack of letter-size thermal paper, roller cleaning sheet, software CD, and documentation.

Custom Solutions

Brother® Mobile Solutions understands that each printer application has specific needs, and sometimes the use model requires more than just the standard offerings. To support our customer's needs, Brother® Mobile Solutions offers flexible printer configurations and power options, support for widely-used laptop and handheld operating systems, and a wide variety of available media options.

However, when our standard products can't meet your needs, Brother's Custom Solutions Group can work with you to develop the right solution - from special media and pre-printed forms, to carrying cases and mounting alternatives, and to custom drivers and software utilities to fit your mobile application.

Contact Brother® Mobile Solutions to discuss your specific needs and learn how we can help you implement the right solution.
