Homework Hotline

In today's environment, administrators are seeking innovative, yet cost-effective, methods to improve the educational process.

The **Homework Hotline** service makes it possible for students to dial in, enter a Class ID, hear the recorded assignments for the classes they are in and, optionally, leave a message for the teacher. It allows a teacher to dial in, enter their ID and PIN numbers, and alter the recordings associated with the classes that they teach. In addition, teachers can, with the press of a button, send mass e-mail messages to students and parents containing the recording as a *.wav file attachment. Furthermore, students have the option of obtaining their homework assignments via the Internet, using the **Homework Hotline** Web site.

- ☒ Retrieve homework assignments online, by phone or by e-mail
- ☒ Students who miss multiple days due to illness can easily access missed assignments and stay caught up with the rest of the class
- ☒ Improves the communication link between teachers, parents and students
- ☒ Assignments for one or more teachers can be retrieved from any place, at any time
- ☒ Easy to administer using a Windows-based system
- ☒ Accommodates an unlimited number of assignments for an unlimited number of teachers (Dependent on hard disk space)
- ☒ Frees teachers and office personnel for other important tasks
- ☒ Ties into the 10-Page Template Web Site that is standard with **e-IVR Fusion™**
