

Penta Series

8/4 Zone Control Panels

HOME NETWORK & SECURITY TECHNOLOGY

Penta

Penta series, the smart choice for homes worldwide, integrates maximum safety and usability in the most cost-effective solution available today. The ultimate solution for small to medium sized installations, the Penta includes 4 security zones and one tamper/key switch zone alongside a wide range of programming options. Now the new Penta Plus provides solutions for larger installations with 8 security zones plus a dedicated fire zone for 4-wire smoke detectors. With more features for enhanced protection, choose Penta for ultimate security you can trust.

- 6 user codes including dedicated master, installer and duress codes
- 3 Distress keys - Emergency, Fire and Police
- Event log
- On-board dialer (FCC, TBR-21 compliance)
- Remote and keypad programming
- Programmable output

Penta - Security You Can Trust

HOME NETWORK & SECURITY TECHNOLOGY

Operational Features

User Codes

Penta offers six user codes including one master code, one installer code and a duress code.

Distress Key Alarms

Each Penta LED keypad display includes three distress keys providing instant notification in the event of fire, police or medical emergencies.

Event Log

A comprehensive event log stores information regarding alarms and system status events.

On-Board Dialer

The Penta series supports two 16-digit telephone numbers providing both primary and backup communication. Popular protocols for central station notification are supported, including Contact ID. Using the optional 'Follow-Me' feature, the system can notify users in the event of an alarm.

Remote Programming

The Penta remote programming software offers a full range of programming capabilities. All programming, system status and operation commands can be performed either from a remote PC or on-site using the 'Off-Hook' feature. Using the toll saver 'RP Callback' feature makes contacting the system cost-effective and efficient. The 'Answering Machine Override' feature enables remote programming when the control panel is connected to a telephone line shared with an answering machine or fax.

Programmable Output

The programmable output can be used for indication of certain status or trouble conditions such as Alarm, Arm/Disarm and AC loss.

Optional Extras:

- 3104 LED keypad for Penta
- 3104+ LED keypad for Penta Plus
- 3601 voice message module
- Cabinet tamper protection switch
- 3721 AC transformer (CE approved)
- RP up/downloading software
