Hypercom® Optimum T4230

Maximum Opportunity, Minimal Expense

Wireless Flexibility In A Countertop Environment

Benefits at a Glance

- Wireless countertop processing – simply plug in and accept payments with out a phone line or Internet connection
- Connectivity through the T-Mobile® GPRS data network ensures extensive, secure wireless coverage
- Lower cost than mobile wireless terminals

No phone line, no problem. The Hypercom® Optimum T4230 delivers a countertop wireless payment solution that ensures you are able to efficiently and affordably process transactions when you have access to power but do not have access to a phone line or Internet connection. The T4230 an ideal solution for your point of sale, and is especially useful at kiosks, tradeshows, outdoor markets, or any environment where you have power and need to accept payments. It can effectively process credit and debit cards, gift cards, dynamic currency conversion (DCC) and electronic benefits transfer (EBT). Its small foot print and ergonomic design helps keep your counters clutter-free.

Hypercom® Optimum T4230

Efficiency & Flexibility

- Process payments while eliminating the burdensome expense of a phone line or Internet connection.

- Accept card transactions anywhere, anytime – instantly add an extra lane during sales, busy holiday seasons or peak store hours

- Offer additional points of sale any where and when you need them – tradeshows, flea/art markets, vendor stands and kiosks

- More cost effective than mobile wireless terminals

Wireless You Can Count On

- Extensive wireless coverage through T-Mobile's GPRS Data network. Coverage can be checked on the data tab at: http://www.t-mobile.com/coverage/pcc.aspx

- Lightning-fast transaction speed – transactions processed in 3 to 5 seconds

- Meets the latest payment industry security standards
