

**Bluetooth Smart Wearable Data Terminal**

GS WT1000 smart wearable data terminal is specially designed for picking and sorting application. It integrates with wearable armband, ring barcode scanner, smartphone battery charger, data communication function into one device. Your workers will experience the advanced mobile computing and scanning technology with Generalscan smart wearable Android data terminal.

With vibration function, users get trigger feedback in noisy environment to recognize whether barcodes was collected successfully. R1000BT-Pro version lengthens the wireless transmission distance to widen scanning scope. R1000BT-HP decodes the barcodes of high density more accurately.

Freely breathing armband, rotation platform, and ergonomic hands-free wearable designs make you feel better even in hot temperature environment and make you easily operate your Apps. You will never be bind with out-of-date wince PDA. Chargeable 3100 mAH battery of GS WT1000BT smart wearable data terminal can provide enough power to ring barcode scanner and Android smartphone for a whole day working.

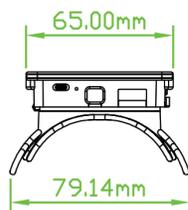

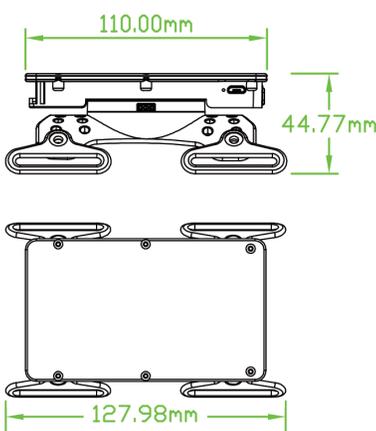

It is an ideal solution for warehouse, retail, asset traceability, express logistics applications. We also provide free iCloudscan App for you to synchronize and share your barcode data freely.
