smart SMART, Smarter than any other ID Card Printer!

SMART-70 Series the large capacity card printer from IDP is ideally suited to users who have large capacity needs, or for end-users who would like to secure their credential media in the securely locked printer.

The SMART-70 Series offers a unique modular design that is easily upgraded by the end-user. Configurations vary from single sided only printing to a fully configured system with dual sided printing, lamination and 500 cards output hopper.

The easily upgradeable: the printer offers a simple no-tool upgrade strategy that any dealer or IT technician would be able to manage in minutes.

Saving maintenance time for replacing ribbon and laminating patch : 500 card ribbon and laminating patch are provided to match the capacity of the input hopper.

Each station (printer, encoding station, laminator, flipper, hopper) connects with an alignment plate. Each station has its own power supply and communication cables are provided to connect each station and synchronize their operation.

Scratch Free

Input Hopper

To disperse the weight of the stacked cards, the card pallet pushes cards to the weight dispersion point and the lowest card is drawn out by hook.

This process prevents the stacked cards from making scratches on the lower cards' surface.

Weight dispersion point

* Input Hopper

* Output Hopper

Output Hopper

When a card is put in the output hopper, to protect the card's surface, the loaded cards are raised by the support beam which is operated by the internal CAM.
