

Modular and Low Profile Touchscreen POS PC

Javelin Viper

The modular Javelin Viper is a low profile touchscreen PC designed for the high-traffic, point-of-sale (POS) environment. The Viper is network-ready with an integrated 10/100BaseT controller and Ethernet interface. Equipped with 6 serial ports (two of which can supply +5Volt power) and two USB ports, the Viper can support myriad peripheral POS equipment such as cash drawers, card readers, scanners, and printers.

Its rugged, aluminum die-cast base provides the Javelin Viper tremendous advantage over other POS systems. Its low profile design requires minimal counter space. The modular LCD display can be positioned at various angles or even be detached from the base and wall-mounted to accommodate special area requirements.

Optional modular POS devices offer additional advantage. Customers can view their sale transactions on the 2x20 9mm-character Customer Display. The magnetic card reader with Smart Card technology allows for fast read and processing of bankcards and credit cards. I/O connectors are located on the underside of the unit which allows easy routing of cables through a small opening in a counter or desktop, concealing dangerous and unsightly cables.

So versatile, the Javelin Viper can be readily configured for remote operation at a distance of up to 50 feet using standard Category 5 cable and up to 100 feet using special cable available from Javelin Systems.

Never has form and function been optimally integrated as on the Javelin Viper which features modular components and flexible open-architecture in a sleek, high-tech design. As POS software becomes more sophisticated and elaborate, the Javelin Viper is well equipped to scale the growing demands of the business environment, providing you with a superior return on your investment.

Quick Service

Table Service

Hospitality

Features

- 333 MHz AMD K6-2 CPU
- L2 Cache, 512K Synchronous Pipelined
- 16MB to 256MB Synchronous DRAM DIMM
- Optional Flash Drive, up to 32MB
- 10/100BaseT Ethernet integrated PCI controller, autodetect
- Removable hard disk drive
- Optional modular MSR with Smart Card Support
- Optional modular 2x20 9mm character customer display
- Fully integrated single-board design
- Y2K compliant

Flat Panel Display

- Integrated resistive membrane touchscreen, mouse type emulation
- Super-twist 12.1" TFT Passive or Active Display
- Spill-proof / water-resistant
- Automatic backlight dimming when inactive for extended life
- 20 to 60 degrees tilt angle

I/O

- 2 USB ports
- 6 Serial ports, 4 external with RJ-45 connectors, 2 internal for Customer Display and Touchscreen
- 1 Enhanced parallel port, ECP/EPP
- 1 Ethernet 10/100BaseT port
- 1 External floppy interface
- 1 2.5" IDE drive bay
- 1 PS/2 type keyboard interface
- Cash drawer port supports up to 2 cash drawers using Y-cable
- LED status indicators

Video Interface

- 800x600 with 16M colors
- PCI Bus Video Controller

Remote Head Configuration

- Up to 50ft. standard category 5 cable
- Up to 100ft. with special Javelin cable

Software

- LAN drivers for multiple networks
- Flash BIOS for upgrades
- Microsoft Windows NT, Windows 95/98, and Windows 3.11
- MS-DOS

Environmental

- Dimensions: 11.94" W x 10.50" D x 10.35" H (without MSR)
- 12.75" W x 10.50" D x 10.35" H (with MSR)
- Weight: 13 lbs.
- Temperature: 0 to 40 degrees Celsius, operating
- Humidity: 10% to 95%, non-condensing
- Safety: UL, CUL, CE
- EMI: FCC Class A, CE
- Materials: Base: die-cast aluminum
- Display: PC-ABS plastic
