

LOBBYTRACK

# Robust Visitor Management

## Minus the Headache

We have optimized Lobbytrack for user-friendliness by building powerful core features and removing the clutter. The result is an intelligent and nimble platform that has everything you need for safe, easy, and affordable visitor management.

## Every Feature You Need and Nothing that You Don't!

## Fast and Easy Visitor Registration

Let your employees pre-register visitors in seconds using Lobbytrack's intuitive browser interface or the native multiplatform Employees mobile app. Your receptionist can register walk-in visitors on the spot using an iPad or a tablet running the Lobby App.

## Secure Touchless Self Sign-In for Visitors

Set up self sign-in kiosks using the Lobby App. Registered visitors can check themselves in by scanning the barcode in their confirmation email with the tablet's camera. Alternatively, your front-desk staff can check in registered visitors with just a few taps using the Lobby mobile app on their tablet, phone or desktop.

## Automatically Print Visitor Badges

Use the Lobby App to capture visitor photos and print badges at sign-in. Customize the badge design to include your logo and visitor information. Lobbytrack will automatically print a badge during visitor sign in. All you need to do is connect a wireless printer and you're ready to print visitor badges.

## Health Questions, NDA and Agreement Signing

Create a safer workplace for all by making it compulsory for visitors to answer health screening questions before signing in. Customize your registration workflow to include a personalized NDA or visit agreement. Signed agreements are saved in the visit log for future reference.

## Real-time Visitor Tracking and Monitoring

Thanks to Lobbytrack Guard App, your security staff will know exactly who just checked in, who is currently on-site, and who has signed out. Security guards can quickly and easily view real-time visitor information including their name, company, host, and check-in location.

## Automatic Host and Guard Notifications

Hosts and security staff receive instant notifications via Lobbytrack Employee App and Guard App the moment guests sign in or sign out. The system logs the check-in and checkout times for each visitor and allows to staff to check out visitors who forget to sign out.

## Reliable Visitor Screening for Criminal Records

Keep the bad guys out by screening visitors against watchlists. Lobbytrack integrates with federal and state criminal databases and other lists using multiple online watchlist providers, including MK Data and Data Diver. Set up deny criteria and get an alert when there's a match.

## Simplified Security Alerts and Evacuation Management

Lobbytrack alerts your security teams when a visitor matches a deny criteria. In case of an emergency, you can use the Lobbytrack web interface to trigger an evacuation. The security guards receive the alert and implement evacuation procedures while monitoring the real-time list of onsite visitors.

## Single Dashboard Contractor and Staff Sign In

Employees and contractors can scan their existing employee badge or use the Employee app for touchless sign in. Easily track time and attendance from a single interface and export the data to your payroll program for automatic compensation management.

## Sophisticated Access Management and Door Control Integration

Want to elevate security and visitor experience? Allow your visitors touchless mobile entry or issue them proximity keycards at check in. Lobbytrack works seamlessly with sophisticated cloud-based access control systems including Openpath and Brivo.

## Built-in Active Directory Integration

Use Lobbytrack Active Directory Sync App to easily add your Active Directory employee accounts to Lobbytrack. Start tracking their time and attendance and authorize them to host visitors. Lobbytrack can automatically pull in changes from your Active Directory and update your active employee list accordingly.

## Capacity Limit Planning and Enforcement

92% of managers say a VMS creates a safer environment. Lobbytrack helps improve health and safety by enabling you implement workplace capacity limits. The software automatically declines further registration and sign in when the preset threshold has been reached.
