

```
if( value == 100 )  
    result = 100;  
if( result != 100 )  
    value = 100;  
}  
}  
return value;
```

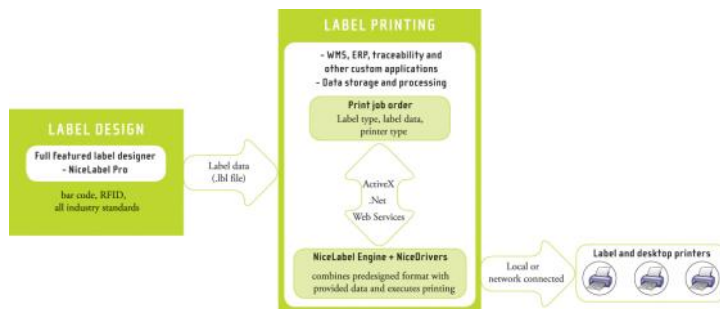

Developing label printing so that you don't need to

- Forget printing and focus on application programming
- Optimized drivers for more than 1800 printer models
- Work in your usual programming language
- Design labels in a graphical designer

You develop applications to answer business needs. We develop label printing to suit all environments. Instead of reinventing basics, use our label printing library and focus on what you do best.

NiceLabel SDK, **NiceLabel PocketSDK** and **NiceLabel WebSDK** are class libraries that give you access to more than 15 years of label design and printing development. Use the market-

ADDING PROFESSIONAL LABEL PRINTING TO YOUR PRODUCT HAS NEVER BEEN EASIER

- ActiveX interface and .NET Remoting
- Flexible and powerful Object Model.
- Can be used in any .NET Language such as C#, VB.NET, Managed C++, etc.
- Can be used in any language as long as the language supports ActiveX technology (**NiceLabel SDK** only)
- Lightweight Windows Installer Merge Module for deployment.
- Sample applications available for C++, Delphi, C#, VB .NET

GET STARTED TODAY, EVERY DAY PROGRAMMING IN PRINTER LANGUAGES IS A DAY LOST

A flexible printing component can help you deliver your project on time and under budget.

Download the **NiceLabel Developer Series** sample applications and see how easily you can liberate your development from the limitations of label printing and thermal printers.

GRAPHICAL DESIGNER

The costs and delays of manual coding in printer languages have no place in the modern enterprise.

NiceLabel Developer Series includes a graphical designer which allows the user to quickly and efficiently perform layout changes or create new labels.

WORK IN YOUR USUAL PROGRAMMING LANGUAGE

Include a full, reliable, and supported label printing class library to your application.

PRINTER INDEPENDENT

Printer brands and models use various interfaces and languages.

NiceLabel Developer Series helps you connect directly to over 1800 thermal printer models, as well as support newly developed thermal and other printers as soon as they're released on the market.
