

MAGNUSTOUCH

the most powerful All-In-One system with data redundancy!

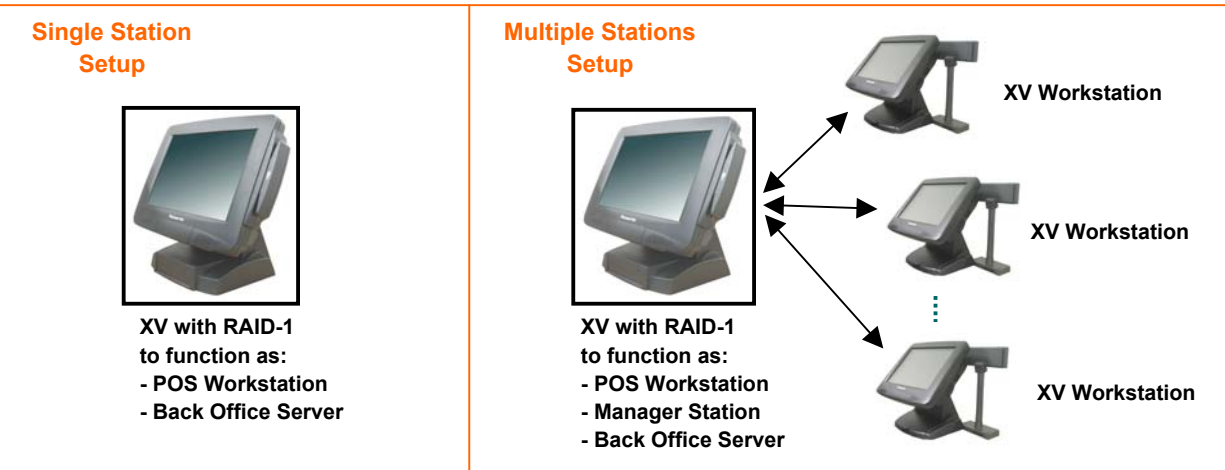

XV SERIES

The XV is a 15" touchscreen with Intel's Dual Core and Core 2 Duo technology. It can be easily upgraded as **business grows** and more data to be processed. Its network supports 1G BaseT with Intel's vPro technology.

Besides power and flexibility, the XV offers built-in **RAID-1 for data redundancy**. By using 2 hard drives, your data will be continuously mirrored onto the second drive. If one drive fails, the XV will automatically run from the second drive, thus reducing down time. Plug in a replacement drive, and XV will re-build the new drive by itself.

XV's RAID-1 feature allows you and your customers to **save costs**. Instead of using an additional PC as Server, you can configure an XV with RAID-1 as both Server and Workstation.

The XV offers a variety of options to improve your business: Credit card reader, Finger print reader, wireless RF 802.11, integrated barcode scanner, Customer display, CD RW/DVD drive.

SPECIFICATION

Display	15" Active Matrix TFT
Processor	Intel Pentium Dual Core 1.8GHz, upto Core 2 Duo 3GHz
Memory	1GB, upto 4GB
Hard Drive	SATA 80GB+ (RAID-1 optional)
