- Required fields
- Default to last-value fields
- Support for common data types
- Relational support, even between different databases
- Indexed searching on the handheld
- Microsoft® Excel analyzer add-in to assist in connecting to Excel spreadsheets

CREATING CUSTOM SOLUTIONS

ScanSeek™ is a unique application that allows you to extend PC-based business applications to a Palm OS®-based handheld device. With ScanSeek™ you are able to instantly create mobile software solutions using Microsoft® Excel, Microsoft® Access, Microsoft® SQL Server, Oracle®, or any other ODBC data source, and build a data collection application based on that data.

SYSTEM REQUIREMENTS

- Pentium® class processor or better
- 32MB RAM
- 20MB available hard drive space
- Windows 9x/ME/NT/2000
- Palm™ Desktop Software (HotSync® Manager)
- Palm OS® handheld device, such as Symbol Technologies SPT1500, SPT1700, Handspring™ Visor™ with Symbol CSM150 or PSC Momentum™ scanners
- Data repository software such as Microsoft® Access, Excel, or any ODBC compliant data source

The RioScan™ suite of products provides mobile software solutions for many of your data collection needs. RioScan™ software is designed to operate in standard PC environments and can easily be customized to meet specific requirements.
