# COMPACT, RELIABLE & FLEXIBLE POS

Placing our latest innovations and proven reliability straight into the heart of every business. Tried and trusted worldwide.

Toshiba gives small and medium businesses a long-term POS solution with extensive flexibility. Straightforward maintenance, modular components and energy-saving performance ensure a low cost of ownership.

*RUGGEDISED FOR RETAIL - The Toshiba WILLPOS B10 has been specifically designed for retail, not adapted to fit as a retail product. Compared to standard PC products, its CPU provides a superior balance between performance and energy efficiency.*

### The WILLPOS B10 package

- POS unit
- TFT display
- POS keyboard
- Customer display
- Cash drawer
- Receipt printer

*CHOICE OF STYLISH COLOURS - The WILLPOS B10 system is available in Fair White and Cool Black*

*SPACE-SAVING - Vertical installation with supplied stands*

*TOOL-LESS ACCESS TO INTERNAL COMPONENTS - Including rapid HDD removal from the front panel*

*SMART CONNECTIVITY - User-friendly colour-coded named ports*

### SMALL & STYLISH PACKAGE

The B10 unit is far more compact than many of its competitors and even 46% smaller than its hugely successful big brother, the WILLPOS B20. It can be mounted either horizontally or vertically, allowing it to fit into the smallest spaces. Available in either sleek black or crisp white, there's a range of options to suit every business application.

### SIMPLE TO MAINTAIN

The hard disk can be quickly and simply removed from the front of the POS unit. There's easy access to the other internal parts yet clever maintenance safety means that it's not possible to remove the cover without first unplugging the power cable. No tools are required to change the hard disk and memory, making future upgrades inexpensive, fast and easy.

### CONNECTIVITY

The WILLPOS B10 has 4 USBs and 4 COM ports and 2 of each are powered, for far less cabling and simple changing of peripherals. All connections are colour-coded and labelled making for a fast and user-friendly set-up.

There's no need to invest in an entirely new system as legacy or new peripherals can all be used, including a wide variety of third party products.

### GREEN MACHINE

Advanced Toshiba processing technology gives the WILLPOS B10 impressive low power consumption, saving money and energy. We also work to strict ecological policies, manufacturing our systems using recyclable materials to be used for long life cycles, to be RoHS-compliant and packaged in recyclable paper products.

### LONG-TERM SUPPLY

Toshiba is one of the only companies that continues to manufacture all of the components in its products and, as a result, is able to provide the assurance of longevity in its build quality and product support.

Our unique approach to total system care, from equipment specification to service maintenance, maximises the benefits to your business of a strong and healthy POS heart.
