MobileInventory v3 Specifications

Desktop Features

### *The Power and Adaptability to meet your needs*
- Track your inventory by Site, Location, Serial Number, Purchase Order Number, Supplier Code, Date Code, Lot, Pallet, and Customer
- Customize the look and feel of the user interface
- Input user-defined text, numeric, and date information for Customers, Items, Locations, Manufacturers, and Suppliers
- Build, customize and print labels and bar codes with the integrated Wasp Labeler software

Fast and Easy to Use
- Navigating is simple using MobileInventory's user-friendly interface
- Extensive help system shows you the features and use of each screen
- Import and Export Customers, Inventory, Items, Locations, Manufacturers, and Suppliers with the easy to use Wizard

Access Information Instantly and Securely
- Find critical data quickly using MobileInventory's advanced find feature
- MobileInventory utilizes Microsoft® SQL Server™ for optimal speed
- Over 40 pre-built reports
- Protect your inventory data with user-level security
- Keep track of who has your inventory with check-in/check-out

Handheld Features

Extend your inventory data to your handheld device
- Supports Palm OS® 3.5 devices and Wasp Portable Data Terminals (WDT-1200)
- Divide the work with multiple PDA and Portable Data Terminal devices. MobileInventory comes with one mobile device license. Additional mobile devices require a license for each device

Manage your inventory
- Add, Remove, Move, Adjust, Audit and retrieve Detail information about your inventory
- Move inventory from site-to-site in seconds
- Search for inventory by item number, alternate item number or description. If you don't know the exact number, search using only the first few characters

Improve inventory counts
- Automatically verify item numbers when input to ensure accuracy
- Accurately perform inventory audits and cycle counts with MobileInventory's Audit feature
- Ensures that you count the right inventory with Location, Serial Number, Date Code, Pallet and Lot tracking data

Efficient and Flexible
- Input data via Graffiti®, integrated bar code scanner or keypad
- Mix multiple mobile devices of different types to fit your needs
- Perform inventory transactions on the spot without guesswork

Robust Synchronization
- Cost effective batch synchronization
- Safely verify transactions before applying them to your database
