Complete Time and Attendance Solution

Wasp Barcode Technologies

WaspTime
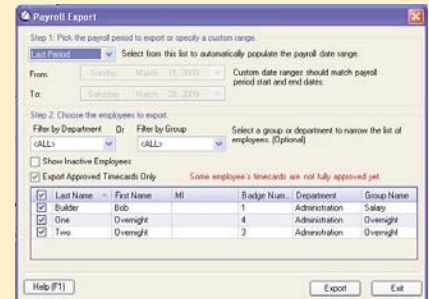

Complete Time and Attendance Solution

WaspTime is a time and attendance system designed to automate employee time and attendance tracking for small to medium-sized businesses. WaspTime software dramatically reduces the number of hours it takes to process employee time records. Available in Standard, Professional and Enterprise editions, WaspTime is scalable to grow with your business.
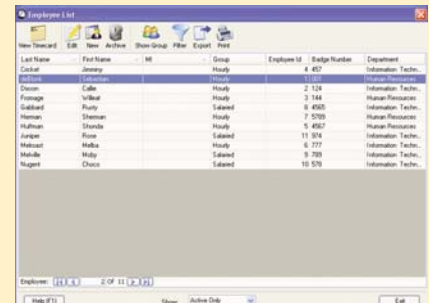

WaspTime works with a variety of employee time clocks, allowing you to choose the optimum way to capture employee time. Select from biometric (fingerprint), RFID or barcode clocks. WaspTime clocks feature integrated network (Ethernet) connectivity, eliminating the expense of a dedicated PC that systems with just a USB connection require. WaspTime is ideal for a wide range of industries where hourly and salaried employee time needs to be tracked, including: manufacturing, warehouse and distribution, healthcare, retail, professional and medical offices, government and educational agencies.

WaspTime gives you control over lost time and productivity, which can significantly impact your organization's profitability. A study by the APA (American Payroll Association) shows that implementing an automated time and attendance system allows companies to save up to 4% of annual hourly payroll expense.
WaspTime solutions provide business owners, HR and payroll administrators an easy way to gain control of employee time.

► Export to payroll systems including ADP, ADP Web, QuickBooks, PayChoice, PayChex and MAS50.

► Customize employee data lists to view anniversaries, departments, phone extensions, and more.

► All-new web module for time card editing and review, available in Professional and Enterprise editions.
